

TECMAILTM

Keeping you connected.

TECMAIL connects the powerful telephone communication tool of *The Education Connection* to your email in-box.

Using the educators' existing email service, *The Education Connection* can now notify educators of waiting One-on-One messages, deliver reports detailing the status of outbound telephone calls, and allow the educators to make changes in their outbound telephone lists.

TECMAIL allows districts to leverage their existing email investment to improve and extend the use of their limited telephone lines.

MORE THAN JUST A "HOMEWORK HOTLINE" **THE EDUCATION CONNECTION**

PROVIDES

- Shared Equipment by Several Schools
- Accessable via Email
- In-Service Training
- Educator-Design for Education
- Customized Support Material
- Detailed Usage Reports
- Private Voice Messages
- Toll-Free Support Line
- Maximal Telephone Line Utilization
- Intelligent Outgoing Calling
- Compatibility with Existing Telephones
- Flexibility from Local-Ownership

Communication for Education

"...I was skeptical at first. To be honest, it sounded too good to be true. As I began to use the program, however, I was simply amazed!" Frank Baxter - Fairmont High School

THE EDUCATION CONNECTION

Insta-Info's *Education Connection* is the key to better community communications.

Designed with the aid of educational professionals, *The Education Connection* improves parent, teacher and community involvement in the educational process.

Three major components comprise *The Education Connection*:

- *Community Contact*
- *Classroom Connection*
- *One-on-One*

Together these three components provide a new and stronger bond between the school system and the community.

Insta-Info's flexible design philosophy means that you can be assured that your *Education Connection* system will be able to expand with your growing communication needs.

COMMUNITY CONTACT

Communicating with the community is of vital importance in maintaining community support for a school system. Many of the informational reminders sent home with the students never reach the intended audience, the parents.

Using *Community Contact* the school district can provide a complete list of activities and events to the community over their tone phones.

Parents and the community can quickly review upcoming events from the convenience of their home or office. Available 24 hours a day, parents, students and others will never miss important information.

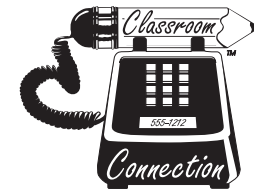

Community Contact provides a cost effective method of distributing information such as:

- Lunch Menus
- Activity Schedules
- School Levy Information

The district can gain valuable insight into the opinion of the community by taking polls using *Community Contact*.

CLASSROOM CONNECTION

Classroom Connection allows teachers to communicate with parents on a daily basis. *Classroom Connection* increases the parents involvement by allowing parents to monitor their children's homework assignments and listen to special notes from the teacher on suggested parent-child activities.

Classroom Connection allows teachers to schedule the system to call selective parents and remind them of an upcoming event or special assignments.

Classroom Connection can also:

- Supplement Absentee Calling
- Contact Parents During Evening Hours
- Alert Parents to Student Behavioral Problems

The *One-on-One* feature allows a teacher, who is not able to talk directly to a parent, the ability to communicate privately with a parent. *One-on-One* also allows private voice messaging between teachers and administrators, teachers and teachers.
